

Bibliography

This bibliography, based on the bibliography in the book, will be updated periodically to reflect new publications and published works deemed important to the controversy. It is intended as an aid to the reader in doing further research and study, not as a complete list of all the voluminous material available on the evolution issue. Included are books, articles, web sites (URLs), organizations, and some material published on the Internet. All Internet-related data was accurate at the time of writing, but due to the nature of the Internet, may have changed before this book reaches the reader's hands.

Works on evolution by proponents of the neo-Darwinian theory

- Bonner, John T. *The Evolution of Complexity by Means of Natural Selection*. Princeton: Princeton University Press, 1988.
- Burnie, David. *Get a Grip on Evolution*. Time-Life Books, 1999. [A popular exposition of the ideas of neo-Darwinian theory.]
- Dawkins, Richard. *The Blind Watchmaker*. New York: Norton, 1996.
